### NON-FINAL ACTION

Applicant's amendment of 3-6-07 has been fully considered. The amended claim 11 has overcome the previous rejection of 112/1<sup>st</sup> paragraph. However, a review of the pending claims shows that the definition of Z on formulae IIIa, IIIb and IIIc is unclear.

Claims 1-6, 8 and 11 are still pending.

#### *Claim Rejections - 35 USC § 112, First Paragraph*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. **New Matter:** Claims 1-6, 8 and 11 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Scope of the subject matter in the present claims is far broader than that originally described and claimed. Note, the "Z" containing ring in original disclosure has the naphthyridine ring system attached at the 4-position of the "Z" ring vs. any available position currently claimed. Also the tetrahydro-naphthyridine ring system originally presented was

limited to the 5,6,7,8-tetrahydro[1,8] isomer and its attachment to the "Z" ring only permitted at the 2-, 3- or 4-positions. Compare the instant formulas with original formula I.

***Claim Rejections - 35 USC § 112, Second Paragraph***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-6, 8 and 11 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and dependent claims thereon recite formulae IIIa, IIIb and IIIc which has ring Z attached to it. Ring Z, in turn, has a tetrahydronaphthyridine group on it. It is unclear how the tetrahydronaphthyridine is attached to ring Z. In the previous response, applicants indicated that the support for those formulae was on page 17. However, it is believed that the portion of ring Z is a shorthand notation for the tetrahydronaphthyridine-piperidine portion in formula I. As written, it is also unclear if the tetrahydronaphthyridine and ring Z would have any substituent as indicated in formula I (variable B). It is suggested that the portion of tetrahydronaphthyridine-piperidine of formula I be present in formula IIIa, IIIb and IIIc.

On Thursday, 5-17-2007, Examiner Truong called Mr. Charles Muserlian to discuss the above 122/2<sup>nd</sup> issue. However, Mr. Muserlian left a message on Friday 5-18-07 indicated that he would not be available to discuss the issue the following week.
